IWVS TEST - INTEGRATIVE WORK VALUE SCALE

The IWVS is a psychometric test that provides an overview of the degree of importance given by an individual to a series of 12 values related to work life. The online test also positions the person being evaluated according to three major dimensions of work values: intrinsic (related to tasks and mandates), extrinsic (related to working conditions) and status (related to success and leadership position).

DIMENSIONS ASSESSED

- ▶ Intellectual stimulation
- ▶ Variety
- ▶ Development
- ▶ Creativity
- ▶ Altruism
- ▶ Cooperation
- ▶ Job security
- ▶ Compensation
- ▶ Flexibility
- ▶ Comfort at work
- ▶ Authority
- ▶ Prestige
- ▶ Intrinsic
- ▶ Extrinsic
- ▶ Status

ADVANTAGES

- ▶ Complete autonomy on Interpreto's user-friendly platform for test administration and report management.
- ▶ Report generated instantly as soon as the candidate completes the test.
- ▶ The results report provides both the degree of absolute importance of each value to the individual being evaluated, as well as its relative importance to the comparison group.

PSYCHOMETRIC QUALITIES

- ▶ Norms: The IWVS was validated in 2022 with a normative sample of 479 Quebec adults.
- ▶ Fidelity: The internal consistency of the value scales and value categories (based on Cronbach's alpha coefficients) ranges from 0.73 to 0.94.
- ▶ Validity: The factor loadings of the twelve values on the three dimensions ranged from 0.40 to 0.92 (structural validity).
